#### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

#### DATA FLOW DIAGRAM – Laptop Request Process in ServiceNow

## **User Stories – Laptop Request Process**

- USN-1:** As a user, I can submit a laptop request through the Service Catalog.
- USN-2:** As a user, I can select the required laptop type/model while submitting the request.
- USN-3:** As a user, I can provide justification and required details for the laptop request.
- USN-4:** As a user, I can upload supporting documents (if required) for my laptop request.
- USN-5:** As a user, I can view dynamic form fields based on laptop type, department, or role selection.
- USN-6:** As a user, I can track the status of my submitted laptop request in real time.
- USN-7:** As a user, I can receive email notifications for request submission, approval, and completion.
  
- USN-8:** As an IT technician, I can view assigned laptop requests in my work queue.
- USN-9:** As an IT technician, I can verify laptop availability in the asset inventory.
- USN-10:** As an IT technician, I can update the status of laptop requests during processing.
- USN-11:** As an IT technician, I can assign laptops and update asset records after allocation.
- USN-12:** As an IT technician, I can add work notes and mark laptop requests as fulfilled or rejected.
  
- USN-13:** As an approver, I can approve or reject laptop requests based on business rules.
- USN-14:** As an approver, I can add comments while approving or rejecting a request.
- USN-15:** As an approver, I can view request details before making an approval decision.
  
- USN-16:** As an administrator, I can create and manage Laptop Request catalog items.
- USN-17:** As an administrator, I can configure catalog variables, variable sets, and UI policies for dynamic forms.
- USN-18:** As an administrator, I can automate the laptop request workflow using Flow Designer in ServiceNow.
- USN-19:** As an administrator, I can manage asset integration between laptop requests and Asset Management.
- USN-20:** As an administrator, I can generate reports and monitor laptop request performance and usage trends.
