Problem – Solution Fit Template

The Problem–Solution Fit

The **Laptop Request Process** project addresses the challenges organizations face in managing employee laptop requests. Traditional request handling involves manual emails, spreadsheets, and ad-hoc approvals that often result in delays, approval bottlenecks, lack of transparency, and increased workload for IT and HR teams. This solution automates the complete request lifecycle using ServiceNow's Service Catalog, Flow Designer, approval workflows, and email notifications, ensuring faster request processing, improved user experience, and efficient IT operations.

Purpose

- Automate the laptop request process to reduce manual effort and processing time. Enable employees to submit laptop requests through a simple self-service portal with variables for laptop type and business justification.
- Improve request tracking with real-time status updates and automated notifications to the requester.
- Streamline approval workflows by routing requests directly to managers to ensure faster decision-making and SLA compliance.
- Reduce repetitive tasks for IT teams by auto-generating catalog tasks for fulfillment after approval, allowing them to focus on provisioning and delivery.
- Increase transparency, reliability, and efficiency in handling laptop requests from submission to fulfillment.
- Enhance employee satisfaction by providing a user-friendly and automated request management system.
- Support organizational productivity by delivering secure, accurate, and timely laptop provisioning.

Problem – Solution Fit Template

Project Title: _____	Date: _____
Prepared By: _____	Version: _____

PURPOSE

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.

1. PROBLEM

1.1 Customer Segment
Who are the customers facing this problem?

1.2 Problem Statement
What is the exact problem your customers are facing?

1.3 Current Impact
What are the effects of this problem on your customers?

1.4 Existing Alternatives
What solutions are they using today? Why are they not satisfied?

1.5 Root Cause
What is causing this problem to exist?

➔

PROBLEM – SOLUTION FIT
How well does the solution address the real problem of the customer?

➔

2. SOLUTION

2.1 Proposed Solution
What is your solution to the problem?

2.2 Key Features
What are the main features of your solution?

2.3 Benefits to Customer
How does your solution solve the problem for the customer?

2.4 Unique Value
What makes your solution better or different?

2.5 Success Measures
How will you measure if your solution is successful?

3. EVIDENCE OF FIT

Evidence Type	Description	Source / Method	Key Findings
Customer Feedback			
Survey / Interviews			
Prototype Testing			
Usage / Behavior Data
